Coroutines are a great way to write asynchronous code that is perfectly readable and maintainable. Kotlin provides the building block of asynchronous programming with a single language construct: the suspend keyword, along with a bunch of library functions that make it shine.. In this post, I'll try to explain in simple words the basics of coroutines and suspending functions.

**How to Make Sense of Any Mess: Information Architecture ...**

Information architecture is the way that we arrange the parts of something to make it understandable as a whole. When we make things for others to use, the architecture of information that we choose greatly affects our ability to deliver our intended message to our users. We all face messes made of information and people.
