NOTE: The following stories seem to describe two kinds of "electric human" phenomena. One involves conventional static electricity, and the other is something more mysterious. If you \*DON'T\* get constant shocks when touching either people or metal objects, yet electronic devices often fail in your presence, then your problem is not strictly electrical.

About Reddy Kilowatt. About Reddy: He's a corporate mascot and, well, "spokesthing," created in 1926 by Ashton B. Collins, Sr., of the Alabama Power Company. Reddy has a lightbulb for a nose, wall outlets for ears and a torso and limbs made of lightning bolts. The character was licensed to power companies across the United States to represent electricity as a safe and useful utility.

Section 2, Battery & Voltage Regulator:. In your Airhead, the primary source of electricity is the battery. It has an INTERNAL RESISTANCE which is VERY low, a very small teensy fraction of an ohm. This is why dangerous currents (like melting things type of currents) can flow with short circuits at the battery, or elsewhere's.

The pedal powered generator from Windstream is perfect for emergencies, power failures, remote locations, and off-grid applications. It can be pedaled or cranked by hand to charge 12 volt batteries and run small appliances. The typical average continuous power that can be generated by pedaling the Human Power Generator is up to about 80 watts.

Pershing has been part of the Army inventory for over 27 years and in Europe since 1964. The evolution of the Pershing missile system and the 56th Field Artillery Command were so significantly intertwined that discussion of one without the other was almost impossible.. The original Pershing missile was conceived in 1957 by the Advanced Ballistic Missile Agency.
